06/2021 - 11/2021

Projects

Ecommerce Website

The "Ecommerce Website" project is a robust and user-friendly online shopping platform built using Django Python, designed to provide a seamless and secure shopping experience for customers. This web application offers a wide range of features for both buyers and sellers, with a focus on scalability, security, and user satisfaction.

The Movie Rental store

The Movie Rental Store project is a web application that allows users to browse, rent, and manage movies. It is designed to mimic the functionality of an online movie rental service.

Analyzing the trends of Covid-19 with Python

From the given data of covid patients, visualized the impact and analyzed the trend of rate of infection and recovery as well as make predictions about the number of cases expected a week in future based on current trends.
